

# Ha Dang

Software Developer

Software Developer based in Helsinki with experience in full-stack web and mobile development. Curious by nature, I enjoy exploring new technologies, solving practical problems, and understanding how people use what I build. I take ownership of my work, communicate openly, and value feedback as an opportunity to improve both my skills and the team's results.

## Experience

### Notoria

Founder & Full-stack Developer | Mar 2026 - Present | Helsinki, Finland

Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle, Stripe, Docker

- Built and launched a language-learning platform with language-specific workspaces, reaching 50 learners with 5,000+ vocabulary entries and 100+ writing worksheets.
- Developed a PostgreSQL/Drizzle backend with Next.js server actions and APIs, implementing authentication, input validation, and user- and workspace-level access controls.
- Integrated AI vocabulary assistance, writing feedback, contextual exercises, and an activity-based Learning Coach; learners completed 1,000+ study sessions through personalized quizzes and spaced repetition.
- Delivered audio/video transcription and AI-generated listening exercises with AssemblyAI and OpenAI, alongside real-time speaking practice using Stream Video and OpenAI Realtime; processed 100+ listening lessons and completed 50+ speaking sessions.
- Implemented CSV/PDF/DOCX import and export with parsing, field mapping, and AI-assisted extraction, plus validated JSON backup and restore
- Established Stripe billing for Pro and Premium with verified webhooks, subscription access controls, and AI usage quotas with refunds on provider failures, gaining the product's first 5 paying subscribers.

### Trancon Co, Ltd

Software Developer | Feb 2026 - Present | Vietnam (Remote)

Next.js, TypeScript, Tailwind CSS, PostgreSQL, Drizzle, Docker

- Delivered an end-to-end warranty ticket platform used by 10–20 technicians and office staff to manage approximately 400–500 tickets per month.
- Built dashboards and filters for open jobs and jobs awaiting parts, reducing daily triage time from approximately 45 to 15 minutes.
- Implemented validated forms and reliable server-side updates for jobs, customers, brands, and components, reducing ticket-related support issues by approximately 40% after launch.

### Factories Technologies APS

Mobile Developer Intern | Aug 2025 - Feb 2026 | Denmark (Remote)

React Native, TypeScript, Expo, Zustand, PostgreSQL, Supabase

- Developed and maintained React Native features in collaboration with product and engineering teams.
- Refactored key UI flows to improve screen-loading consistency and reduce recurring issues during testing.
- Resolved approximately 15 high-priority bugs identified by internal testers.

### Beiarntek AS

Frontend Developer Intern | Feb 2025 - Aug 2025 | Norway (Remote)

React.js, TypeScript, Tailwind CSS, Python, PostgreSQL, Stripe, VIPPS

- Developed responsive Next.js interfaces across 10+ core pages, standardizing UI patterns and improving usability across desktop and mobile experiences.
- Integrated a Mistral AI-powered chatbot for common onboarding questions, automating repetitive support interactions and reducing manual support workload.
- Implemented Stripe and Vipps payment flows with validation and error handling, improving checkout reliability for early users.

## Education

2022-2025

### Oulu University Of Applied Sciences

**Bachelor of Engineering, Information Technology**

GPA: 4.4/5
